

How to use less energy

By making simple changes, you can make your home more energy efficient, helping reduce bills and lower your carbon footprint. Now that is smart!

Bathrooms

Reducing your shower time by one minute will reduce your bills. Further energy savings can be made by fitting tap inserts and aerating shower heads.

Bedrooms

Do you have spare rooms? Adjust your radiator controls so you don't heat rooms that are unused.

Kitchen

Make sure your washing machine always has a full load. Energy can be saved by using a 30°C wash.

Don't over-fill your kettle and only boil the water you need.

Don't keep water running whilst washing dishes.

Choose the eco setting on your dishwasher and ensure it is full before every wash.

Living Room

Turn off as many lights and appliances as possible when not using your living room. Further energy savings can be made by avoiding standby mode.

Insulation

Consider loft and wall insulation to prevent heat leakage.

Garden

If the sun is shining turn off the tumble dryer and dry your clothes naturally.

Heating

Timing is key. Programme your boiler to come on only when you need it. Aim to keep your thermostat between 18°C – 21°C to target a big annual saving.
