ADM™ is the intelligent
metering solution

ADM™ MAKES
DATA LOGGING
EASY

sms-plc.com

The intelligent metering solution

ADM™ is an intelligent Automated Meter Reading (AMR) solution from SMS Plc. The device is beautifully simple – designed and built using proven, robust technology. Effortlessly activated in a matter of minutes, it fits to all pulse-output water, natural gas, LPG and electric meters. **ADM™ makes accurate data logging easy.**

As well as providing a reliable and cost-effective AMR service, ADM™ is ASPCoP-accredited, meaning you can be assured over optimum levels of safety, precision, and quality.

KEY FEATURES

- Simple to deploy: activation can be completed within minutes – no engineer required
- Universally compatible with all international pulse-output meters: water, natural gas, LPG, and electric
- Provides half-hourly data intervals – sent in a format and frequency to your requirements
- Data accessible via **SmartVisionPro**, our cloud-based energy analytics software
- Uses existing communications networks
- Designed to collect pulses from volt-free pulse outputs
- Certified under ATEX/IECEX as gas safe, suitable for gas hazardous zones (gas groups up to IIB)
- IP68 certified (water)
- Battery design life of 10 years

THE BENEFITS

Reduces need for manual meter reads

Accurate data for enhanced billing and energy management

Facilitates cost and carbon reduction

Access to data portal for optimum visibility

- ✓ Improved consumption insight, putting customer in control of usage
- ✓ Use **SmartVisionPro** to visualise and manage data
- ✓ Customer configurable exception alerts
- ✓ Rolling 30-day data memory capacity
- ✓ Assists in load prioritising for purchasing

Data logging is as easy as...

adm™

1

FIT

A self-installation device, ADM™ retrofits directly to any pulse output water meter, as well as pulse output gas, LPG and electricity meters. No engineer required – simply attach the ADM™ into place.

2

ACTIVATE

To begin the activation process, place a magnet on the activation point of the ADM™ device. This will trigger a green/red flashing LED sequence to establish connection. The amber LED will also flash whenever a pulse is detected.

3

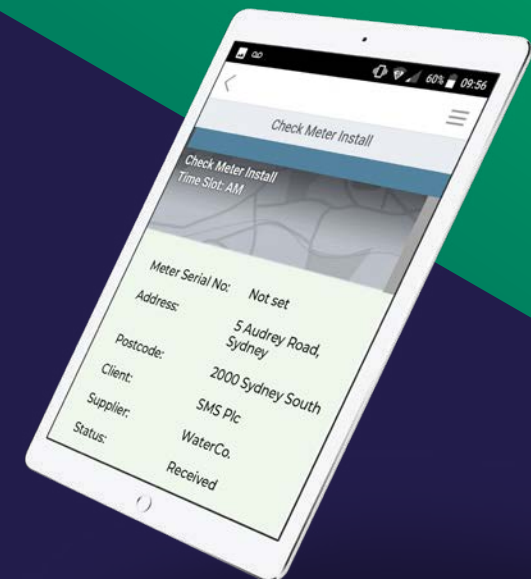

CONNECT

When the green light turns solid, ADM™ commission has been successful, and data logging begins. Review your data on the **SmartVisionPro** platform and receive 1/2 hourly reads in a file format of your choice.

REGISTER YOUR ADM™ DEVICE WITH OUR APP!

Downloadable via IOS and Android, our App gives you the option of registering the installation of your device, associating it with the meter point and the asset register of the utility supplier.

For suppliers, the app also provides an efficient field management system, allowing clear tracking of scheduling and other installation information.

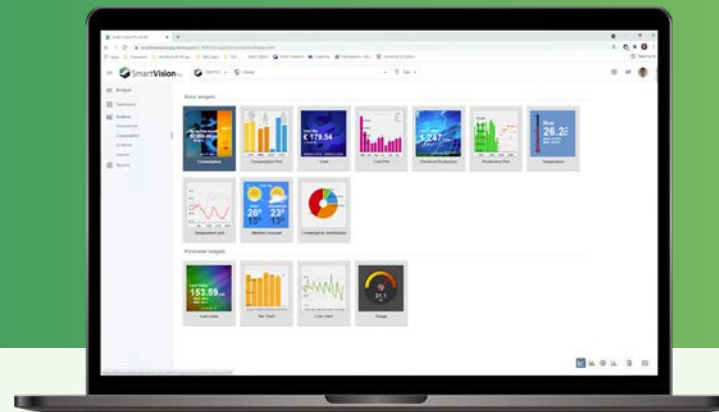

Get more from your data with

SmartVision^{Pro}

The smart energy savings tool

admTM

Take full control of your costs and save resources with our highly-intelligent, cloudbased energy management platform.

Seamlessly compatible with the ADMTM data logger device, **SmartVisionPro** makes it possible to inspect consumption patterns, verify project savings, track key performance indicators (KPIs), and even forecast and budget for the future, giving you maximum visibility of your consumption and the ability to identify, adjust, and conserve.

KEY FEATURES

One easy-to-use portal

Multi-platform functionality

User-friendly cloud-based software

Access to API integrations

Dashboard for automatic monitoring and targeting

Unlimited scalability

Remote updates to ensure continuous improvement

SmartVisionPro proves a perfect partner to ADMTM, helping you promote energy conservation measures and reduce costs.

Leading the smart energy revolution

We have been at the heart of the energy market for over two decades and are playing a critical role in transforming and decarbonising the energy system.

As a major energy services and smart metering company which places data, technology and sustainability right at the very core of our ethos and business model, SMS is committed to delivering the future of smart energy.

We fulfil this vision through our unique energy offering, serving energy suppliers, the industrial and commercial sector, and the wider domestic market to realise both the environmental and financial benefits of smarter energy practice.

Our services

SMART METERING & DATA

- Smart meter installation
Meter Asset Provider (MAP)
- Meter Asset Manager (MAM)
- Meter Operator (MOP)
- Data Collector & Aggregator (DCDA)

SMART ENERGY SERVICES

- Energy Strategy & Delivery
- Carbon Reduction Asset Funding
- Sustainability Consultancy

SMART UTILITY SERVICES

- Major utility infrastructure projects
- Distributed generation services
- EV charging solutions

Take advantage of the intelligent metering solution
